PROFESSIONAL SUMMARY

Frontend Developer with 5 years of experience in web and mobile application development and project leadership, specializing in creating scalable and impactful digital solutions.

KEY SKILLS

- Programming Languages: JavaScript, TypeScript, PHP, Python
- Frontend Technologies: React, React Native, Angular, Redux, MobX, Vue.js
- Additional Technologies: WebSockets, RNReanimated, Three.js
- Backend Technologies: Python (Flask), PHP (Laravel), Node-JS
- Data Management: PostgreSQL, MySQL, SQL, MongoDB, RESTful, GraphQL
- Development Tools & Practices: Git, Docker, CI/CD, Unit testing
- Languages: English, Russian

PROFESSIONAL EXPERIENCE

Frontend Developer (React Native)   **01/2022 - present**
PetsOk, Tampa, FL, USA
Responsibilities:

- Joined a team of front-end developers in building and maintaining complex web applications using React and mobile applications using React Native, ensuring seamless cross-platform user experiences.
- Collaborated with UX designers to implement responsive and visually appealing UI/UX designs for web and mobile platforms, resulting in a 30% increase in user retention.
- Implemented best practices for code quality, including automated testing, code reviews, and continuous integration, leading to a 40% reduction in bug reports.
- Worked closely with clients to gather requirements, provide technical guidance, and deliver solutions that exceeded their expectations in web and mobile development.

Achievements:

- Successfully completed a major platform migration from Angular to React, resulting in a 50% improvement in page load times and a 25% increase in conversion rates for both web and mobile platforms.
- Developed a real-time dashboard for monitoring critical business metrics using React and Redux for web and React Native for mobile, providing stakeholders with actionable insights on multiple platforms.
- Implemented lazy loading and code splitting techniques to optimize website performance, resulting in a 60% reduction in initial load times for web and significant improvements for mobile.

Frontend Developer (React)   **12/2020 - 01/2022**
VK.com, Saint-Petersburg, Russia
Responsibilities:

- Built and maintained responsive web applications using React and Redux while specializing in the development of cross-platform mobile applications using React Native, ensuring consistent user experiences across platforms.
- Collaborated with the back-end development team to integrate front-end components with RESTful APIs, enhancing data retrieval and synchronization for both web and mobile platforms.
- Conducted performance audits and implemented optimizations, resulting in a 25% reduction in page load times for web and mobile applications.
- Assisted in code reviews, mentored junior developers, and provided training on React and React Native best practices.

Achievements:

- Successfully implemented a custom mobile-first design for a client's website, leading to a 40% increase in mobile traffic and engagement while maintaining a consistent user experience across platforms.
- Created reusable UI components and libraries that improved development efficiency and reduced code duplication by 30% for both web and mobile projects.

Full-stack Developer   09/2019 - 09/2020
TechSolutions LLC, Saint-Petersburg, Russia

Responsibilities:
- Assisted in the development of front-end components for web applications using React, gaining valuable experience in modern web development.
- Participated in daily stand-up meetings and sprint planning sessions to contribute to project progress.
- Collaborated with senior developers to learn best practices in React development and version control systems.
- Gained hands-on experience in code reviews and Agile development methodologies.

Achievements:
- Successfully acquired practical development skills in React.

Junior Frontend Developer   09/2018 - 09/2019
AppTech, Omsk, Russia

Responsibilities:
- Contributed to the development and maintenance of web applications, gaining foundational skills in frontend development.
- Worked closely with senior developers to understand project requirements and implement solutions that met quality standards.
- Participated in team meetings and code reviews to improve code quality and learn best practices in frontend development.
- Assisted in troubleshooting and resolving bugs to ensure smooth functioning of web applications.

Achievements:
- Successfully completed projects within deadlines, demonstrating ability to work efficiently in a team environment.
- Acquired practical knowledge in frontend development, including HTML, CSS, and JavaScript, through hands-on experience and mentorship.
- Enhanced problem-solving skills by tackling real-world challenges in web development projects.

ADDITIONAL WORK EXPERIENCE

Mobile Application USCIS Cases Tracker
Available in AppStore and Google Play.
- Developed both the mobile application and its backend for the USCIS Cases Tracker app. For the backend, Created a neural network for solving CAPTCHA, utilizing numerous proxies and a smart algorithm for their selection, multithreading, and various techniques to improve usability, including caching. I aimed to make the application as lightweight and user-friendly as possible, improving response times and ensuring a convenient interface.

Telegram bots in Python
- Related to cryptocurrency, blockchain, notifications for various information, and smart bots for fighting spam.

EDUCATION

Software engineering   09/2007 - 07/2013
Omsk Industrial and Economic College, Omsk, Russia
- Achieved a GPA of 5.0 out of 5.0, placing in the top 5% of students
- Acquired foundational skills in object-oriented programming, databases, and various programming languages, mastering the fundamentals with excellence.
